Amman, Jordan
LinkedIn: [Hashem Qudah](#) / [Portfolio](#)

Data Science & AI student with hands-on experience in machine learning, deep learning, NLP, big data analytics, and AI-powered solutions. Proven leadership experience managing technical teams, supporting strategic planning, and building active tech communities. Seeking to apply strong problem-solving, predictive modeling, NLP, and data manipulation skills in a challenging technical internship role.

EDUCATION

Al Hussein Technical University (Oct. 2023 – Present) Amman, Jordan
B.Sc. in Data Science & Artificial Intelligence | Expected Graduation: June 2027

- Relevant Coursework:** Machine Learning, Deep Learning, NLP, Predictive Analytics, Big Data Analytics, Optimization Algorithms, Data Structures, Computing Fundamentals, Database Management (SQL), Discrete Mathematics.

LEADERSHIP EXPERIENCE

Fellowship Member, Al-Hussein Fellowship Program (Jan 2026 – Present) Amman, Jordan

- Selected from a highly competitive national pool for the 5th cohort, focusing on "Service for Leadership," strategic planning, and social innovation.

CEO of Interns, Wider Community (Jan 2026 – Present) Amman, Jordan (Remote)

- Led the founding engineering cohort to build a scalable digital ecosystem by managing workflows for Data, Backend, and Frontend intern teams.
- Bridged operational strategy with technical execution, utilizing data analytics and performance tracking to optimize squad performance and community growth.

Co-Lead & Event Manager, Google Developer Group at HTU (Oct 2024 – Present) Amman, Jordan

- Led the chapter's initiatives, organizing technical workshops and tech events that fostered hands-on learning and innovation.
- Managed logistics and coordinated cross-functional teams to maximize attendee experience and technical collaboration.

Head of Strategy & Growth, AiMinds Jo. (Oct 2025 – Apr 2026) Amman, Jordan

- Led strategic planning and community growth initiatives, empowering members in AI and Data Science across Jordan.
- Built partnerships with organizations and universities to support technical projects, hackathons, and mentorship programs.

KEY PROJECTS

- Big Data Traffic Accidents Analytics & Visualization**
- Developed a big data analytics and visualization project using Python, Polars, and Power BI to process the US Accidents dataset, cleaning and engineering 7.7M traffic accident records from a 3.06GB Kaggle dataset to identify geographic, temporal, and weather-based accident risk patterns for data-driven transportation safety decisions.
- Social Engineering & Phishing Detection in Dialectal Arabic – Computing Research Project**
- Developed a mixed-methods cybersecurity research project using Python, AraBERT, Hugging Face Transformers, an Arabic phishing dataset, and survey analysis to detect phishing intent in dialectal Arabic text, achieving 98% phishing recall while examining user vulnerability to localized social engineering attacks.
- ReadMind AI | Full-Stack Educational Platform**
- Built a bilingual Arabic/English educational platform using Python, Streamlit, Gemini 1.5 API, and Firebase to convert PDFs into structured study guides, quizzes, and a context-grounded academic chatbot with secure authentication and session archiving.
- Telco Customer Churn Prediction**
- Developed an end-to-end churn prediction pipeline using Python, Scikit-Learn, Orange, and Tableau, optimizing a Random Forest model with GridSearchCV to improve recall to 77% and support business reporting through an interactive dashboard.
- AI-Powered Data Cleaning Tool for PwC Jordan**
- Developed a strategic plan for a bilingual Arabic/English NLP-based data cleaning solution aligned with ISO 27001, demonstrating potential to reduce manual cleaning time by 60% and achieve 95% accuracy based on a mixed-methods research study.
- Logitech Sales & Inventory Optimization**
- Applied Power BI, Excel, Orange, Genetic Algorithms, and ARIMA forecasting to optimize Amazon pricing and inventory decisions, identifying a \$100–\$110 price equilibrium for stronger sales performance and stock planning.

H.A.I.E. Infection Prediction Model - HAAC 2025

- Architected an AI-driven healthcare analytics concept using Google Cloud, SQL, and the Data Science Life Cycle to predict hospital-acquired infections from patient vitals and medical history, demonstrating a potential 17% reduction in mortality and 30% cost savings.

Autonomous Line-Following Robot - STEM Expo

- Designed and programmed an autonomous line-following robot using C++ and infrared sensors, earning Distinction for technical execution, sensor calibration, navigation accuracy, and teamwork.

CERTIFICATES

- **Supercharge Your Data Analytics with Generative AI, IBM SkillsBuild (April 2026)**
 - Core Competencies: Generative AI for Analytics, Automated Insights, Scenario Analysis, and IBM watsonx.
- **AI Engineer for Data Scientists Associate, DataCamp (March 2026)**
 - Core Competencies: Generative AI, Predictive Modeling, Feature Engineering, Data Management for AI, and Exploratory Data Analysis (EDA).
- **Data Science Professional Track, DataCamp (2025)**
 - Included: Introduction to SQL, Data Manipulation with pandas, Intermediate Python, and Introduction to Python.
- **Professional Integrity & Operations, British Council (2025)**
 - Exams Invigilation & Customer Experience Training.
 - Mandatory Certifications: Child Protection, Fraud Awareness, Safeguarding, Security, Equality & Inclusion, and Information Management.

SKILLS

- **Programming Languages:** Python, SQL, C++, Java, C
- **Frameworks & Libraries:** Pandas, Polars, NumPy, Scikit-learn, Matplotlib, Seaborn, TensorFlow, PyTorch, PyArabic, EvoloPy
- **Technologies & Platforms:** Power BI, Tableau, Jupyter Notebooks, Google Colab, Google Cloud, Orange Data Mining, Arduino
- **Fields of Expertise:** Machine Learning, Predictive Modeling, Data Analytics, Feature Engineering, NLP
- **Leadership:** Team Leadership & Strategic Planning, Public Speaking, Community Building, Team Management, Event Management

LANGUAGES

- **English** (Full professional proficiency)
- **Arabic** (Native)

RELEVANT EXPERIENCE

- Exam Invigilator, British Council (Apr 2025 – Present)**

Amman, Jordan

 - Supervised exam sessions to maintain organized, secure, and fair environments in strict adherence to British Council standards.
- Usher, Al Hussein Technical University (HTU) (Apr 2024 – Present)**

Amman, Jordan

 - Organized and supported student activities and university events, ensuring smooth operations and high attendee satisfaction.
- Assistant Event Coordinator, Center of Professional Development (CPD) - HTU (Jun 2025 – Nov 2025)**

Amman, Jordan

 - Supported the execution of workshops and training events, conducted follow-up calls, and maintained attendance records using Excel.
- Event Manager, HTU Math Marathon (2025 – 2026)**

Amman, Jordan

 - Managed competition operations for the university, including participant coordination, registration, and event logistics.
